URGE OFFICIALS TO LET FREEDOM LIVE

IN 2024, THERE WAS ONE COPPER CREEK WOLF LEFT BEHIND. DUE TO CONFLICT, HE WAS TARGETED FOR LETHAL REMOVAL.
HE WAS SHOT AND SURVIVED.
HE HAS DEMONSTRATED THE RESILIENCE OF WOLVES DESPITE ALL ODDS.
OFFICIALS ARE GOING AFTER HIM AGAIN WITH NO JUST CAUSE.

Instead of a number, we gave him a name. FREEDOM

TALKING POINTS

1. **CPW publicly stated we have high mortality. If we aren't reintroducing more wolves, we MUST prioritize the health & genetic diversity on the landscape and protect the ones we have!**
2. **This wolf does not meet the criteria for chronic depredation and should not be in consideration for targeted removal.**
3. **He was injured but has healed enough to survive for 6 months with no assistance, and is clearly still able to do so. Let him remain a symbol of resiliency and a maverick for survival. Leave him be for the sake of all wolves on the landscape!**
4. **In your own words, let them know why this wolf should be given the opportunity to live.**

Kids, please use your own words when making comment to help this wolf from being killed
